

## JOB DESCRIPTION

### Advanced Application Engineering Analyst

#### Overview

Join our diverse group of innovators, working together to solve industries' and organizations' most challenging problems. Use leading-edge technologies and strategies to reinvent the way every job is done and help improve the way world works and lives.

#### What would you do?

As an Advance Engineer you would largely be involved in:

- Build & demonstrate deep technology specialization in newer emerging areas (Automation, Artificial Intelligence / Data Architectures/ Security, Big Data, Hadoop, Blockchain, Virtual Agents, Micro service topologies)
- Design custom technology solutions relevant for client's context.
- Do full-stack development in hyper agile environment.
- Build proprietary assets, prototypes, innovative applications, Bots, creating New IPs, Deep Learning models, new NLP solutions, etc.

#### What we need?

We would love you to have:

- Hands on experience in writing code frontend/backend/database server and exposure to test automation frameworks
- Good analytical and problem-solving skills and proficient in verbal communication skills
- Working knowledge with source control, build, deployments git/TFS, build definitions.
- Ability to ramp up on existing solution/project and quickly contribute towards bug fixes.
- Take ownership of the successful implementation and performance of the solution
- Multi-disciplinary and versatile with aptitude to learn and apply new skills faster
- Potential to manage client interactions with proficiency.
